

ACS 数据库平台功能介绍

The screenshot displays the ACS Publications website interface. At the top, there are navigation links for 'Log In', 'Register', 'ACS', 'ACS Publications', 'C&EN', and 'CAS'. Below these are links for 'ACS Journals', 'ACS eBooks', and 'C&EN Global Enterprise'. A search bar is prominently featured with options for 'Search', 'Citation', 'Subject', and 'Advanced Search'. The main header includes the ACS Publications logo and the tagline 'Most Trusted. Most Cited. Most Read.'.

The navigation menu includes links for 'Authors & Reviewers', 'Librarians & Account Managers', 'ACS Members', 'Alerts', 'About Us', and 'ACS & Open Access'. The main content area is divided into several sections:

- ACS Editors' Choice:** A section highlighting featured articles, including a chemical structure of *N*⁶-hydroxy-L-ornithine and *N*⁶-anhydromevalonic acid, and a chromatogram with peaks labeled 1, 2, 3, 4/5, 6, and 8.
- View all 1,000+ Open Access Articles:** A link to access a large collection of open access research.
- Sign Up for Email:** A section encouraging users to sign up for free daily or weekly email alerts to stay updated on new research.
- c&en:** A section for Chemical & Engineering News, featuring headlines such as 'White House attempts to clarify, but not change, genetic engineering regulations' and 'Aptamer-based sensors could measure drug levels in real time'.

At the bottom, there are links for 'Publications A-Z', 'CAS Subjects', and 'Cover Gallery'.

ACS eBooks

Spanning the gap between discoveries published in patents and journals, the peer-reviewed eBooks of the ACS contain essential research by the world's leading scientists spanning all disciplines and applications.

The eBooks consist of the ACS Symposium Series and the Advances in Chemistry series.

ACS电子图书简介

ACS eBooks

ACS数据库包含**1400**多本同行评审的电子书，涵盖食品生产、新型材料、绿色化工、化学教育、化学信息学等多个应用领域，记录了半个多世纪的化学发展历程和最新技术成果，被誉为资讯的金矿。既可为化学科研及从业人员提供参考，又可为化学教育和学科建设提供素材和范例

ACS SYMPOSIUM SERIES eBooks

ACS Symposium Series 会议录系列 (1974-2016)
经过同行评审，每个章节由不同专家编写，由国际公认的学科领域专家负责编辑，每年出版约30本 eBooks

About C&EN Global Enterprise

Chemical & Engineering News (C&EN) is an award-winning go-to news source for members of the worldwide chemistry community in academia, industry, and beyond. Its coverage spans the latest research advances, the business and policy trends that are changing our discipline, crucial chemical safety data, job and career information, and more. Through C&EN Global Enterprise, experts gather and deliver scientific news that can't be found outside of C&EN, providing balanced journalism that critical thinkers around the world demand.

About the Cover: An interfacial self-assembly method is used for preparing a high-quality semiconductive metal-organic framework (MOF) thin film, which is constructed as a channel layer for high charge mobility porous field-effect transistors (FETs). This may expand MOF applications to include FET-based sensors, voltage-gated ion channels, and microfluidic chips. [View the article.](#)

Abstract

文摘

文摘图片

A combination of spectroscopic and electrochemical methods—XANES, EXAFS, X-ray, ^1H NMR, EPR, Mössbauer, and cyclic voltammetry—demonstrate that the most efficient Pd catalysts for the asymmetric rearrangement of allylic trifluoroacetimidates unexpectedly possess in the activated oxidized form a Pd^{III} center bound to a ferrocene core which remains unchanged (Fe^{II}) during the oxidative activation. These are the first recognized Pd^{III} complexes acting as enantioselective catalysts.

1a. Bimetallic Pd(III) complexes in palladium-catalysed

Powers, David C.; Ritter, Tobias

Nature Chemistry (2009), 1 (4), 302-309, S302/1-S302/127 CODEN: NC

Palladium is a common transition metal for catalysis, and the fundamental role of Pd(II) in catalysis has not been investigated previously. In this article we present the formation of carbon-heteroatom bonds via the involvement of two palladium atoms of the bimetallic core during both oxidative addition and reductive elimination. This mechanistic insight provides an opportunity to explore rationally the potential of Pd(III) in catalysis.
